

AIR STRIP

One of the most popular anti-fatigue matting choices for general use. It features a unique design that allows the mats to be interlocked together to a desired length. Or choose the "single" section that is beveled on all 4 sides. Available in both regular and grease-resistant.

- Molded "air pockets" beneath mat provides a buoyant, comfortable surface to relieve fatigue
- Beveled borders eliminate tripping; improves safety
- Rubber is slip resistant- wet or dry

Applications: Behind counters, checkout stands, production areas, assembly lines, areas where people stand or walk for long periods of time. Use Grease Resistant formula in kitchens, garages, machine shops.

Made of: Rubber

Thickness: 1/2"

Weight: 10 lbs each

Size: (Note: Connect 2 "End Sections" together or add a "Center Section" to add length)

End Section, Center Section- 28"w x 36"l
(connects in 3' increments)

Single Section- 28"w x 36"l Beveled all sides

End Section, Center Section- 36"w x 24"l
(connects in 2' increments)

Design: Embossed surface; waffle design underside; beveled edges for safety

Installation: Loose Lay

Colors: Black only

- When ordering - specify REGULAR or GREASE RESISTANT
- Use a SINGLE section for a workstation
- Connect ENDS and CENTERS to create any length in 2' or 3' increments
